A: Try putting the file in lib/ in your.profile. Just add the line: LIBS="lib" to the beginning of your.profile file. The cause of the error is the fact that, on the Mac, a file that you have the directory in your current path is considered a standard command and executed by the shell directly. So the shell tried to execute the data in the file and found it to be a bad thing to do. Shells are picky, by the way; so if you use the Apple Terminal.app, it may not behave the same way. To see what else it will try to do with your command, you can add set -x at the beginning, or use bash -x. Q: Solve and square the value from a trig equation I have a trig equation: $y = \frac{x}{4} \cos^3(\frac{x}{2})$ I need to find the x value that make the function: $y^2 = f(x)$ Someone told me that I have to solve the equation first and then square the result. The problem is I dont know how to do that stepwise. A: Let's square the equation, and simplify: $y^2 = \frac{x^2}{4} \cos^6 x$. Then, $y^2 - \frac{x^2}{4} \cos^6 x = 0$, or $4y^2 - x^2 \cos^6 x = 0$. Now, squaring $4y^2 = x^2 \cos^6 x$: $16y^4 = x^2 \cos^{12} x$. A similar thing happens for the next step. of Darnielle's or Doyle's or Lindstrom's or Elizabeth Wollheim's or I Am Cait's or Truesdale's or anyone's who puts themselves out there and becomes visible and someone else who is actually invisible, or from a different place, who's also put themselves out there, and who can be hurt or affected by the other. It's complicated and it's not an easy world, and I just wanted to draw attention to this idea of really looking
